TASK:

1) Create a directory called "my_folder", navigate into it, and create a file named "my_file.txt" with some text. Then, create another file named "another_file.txt" with some text. Concatenate the content of "another_file.txt" to "my_file.txt" and display the updated content. Finally, list all files and directories in the current directory.

2) Create 20 files with .txt extensions and rename the first 5 files to .yml extension. Print the latest created top 5 files among the total no of files.
